

LMD-2110MD

Medical LCD Monitor

SONY

Sony introduces a new medical LCD monitor – the LMD-2110MD – which complies with medical safety standards and EMC standards while maintaining an excellent cost: performance ratio.

Equipped with a 21.5-inch* full-HD (1920 x 1080 pixels) high-resolution LCD panel, the LMD-2110MD delivers crisp high-definition (HD) images. Combined with a 10-bit digital signal processing system, this monitor offers stunning and smooth grayscale.

The LMD-2110MD is equipped with conventional versatile analog input interfaces and an HDMI input, which can accept HD signals up to 1080/60p. In addition, this monitor can input HD/SD-SDI signals using the optional BKM-341HS input adaptor.

These features and benefits make this monitor a perfect cost-effective choice for a wide range of applications in healthcare settings.

21.5-inch Full-HD (1920 x 1080 pixels) Resolution, 10-bit Signal Processing

Incorporating precisely manufactured high-purity RGB color filters and a high-speed response LCD panel, the LMD-2110MD delivers accurate color reproduction and stunningly lifelike crisp images. All SD and HD input signals are converted into 10-bit digital signals without any picture deterioration via full digital imaging circuitry. This 10-bit signal processing achieves significant signal-to-noise ratio (SNR) improvement and smooth grayscale compared to 8-bit data processing.

Wide Range of Standard Input Interfaces

The LMD-2110MD is equipped with a full range of analog inputs including a composite, Y/C (S-Video), analog component, and RGB. Also included is an HDMI, which can accept HD digital signals up to 1080/50p and 60p. DVI signals can be input via the HDMI input connector using a conversion cable.

Optional HD-SDI Interface

In addition, this monitor supports HD-SDI input with an optional BKM-341HS HD/SD-SDI input adaptor. This input versatility allows the LMD-2110MD monitor to flexibly connect to HD-SDI digital environments.

Compact Design – Portable and Flexible

Unlike CRT monitors, terrestrial magnetic fields have no influence on LCD monitors. This means the LMD-2110MD can be carried and used in any position and location. With the standard monitor stand, users can set the monitor anywhere and use it immediately. The LMD-2110MD provides VESA™ - standard mounting holes with 100 mm pitch, and is flexible enough to install with a VESA arm and on a medical cart.
