EndoSizeMe[®]

The collaborative case planning solution.

EndoSizeMe[®] app now available to share
interactive case planning reports
with your colleagues.

EndoSize®

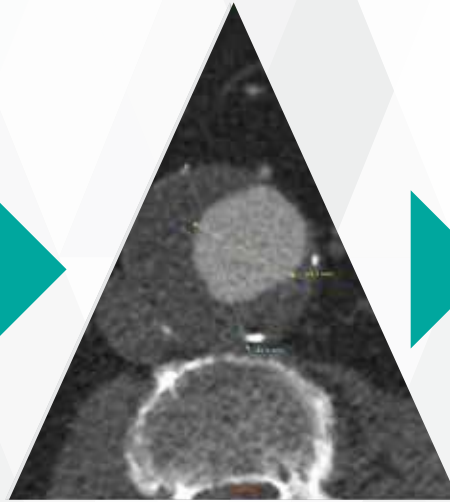

EndoSize® - your comprehensive solution for endovascular procedures planning. Designed to efficiently support your daily practice, EndoSize® provides a powerful toolbox for device sizing and case strategy development.

Step-by-Step Procedure Planning

Centerlines

Measurements

Strategy

Intuitive

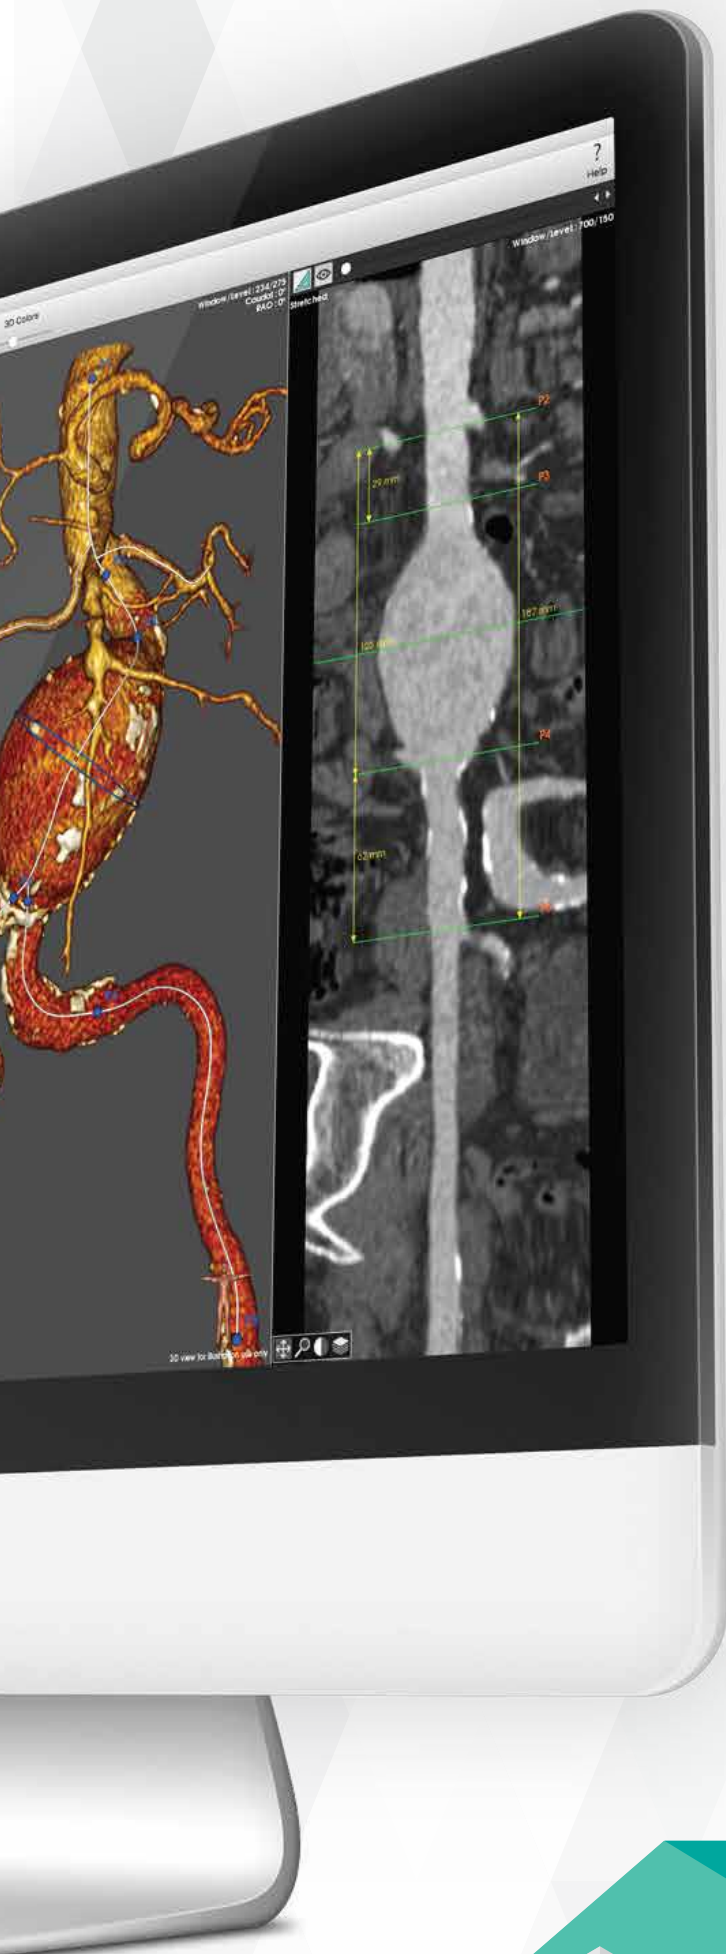

- Easy to learn and use toolset with intuitive interface
- Streamlined step-by-step workflow
- Rapid, 3-point centerline generation

Intelligent

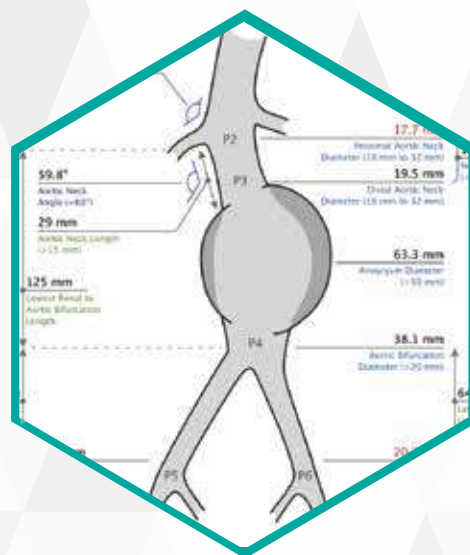

- Automated measurements with manual adjustment capability
- Integrated device catalogs for strategy planning
- Built-in algorithm for inner/outer curve length and lumen volume estimation

Insightful

- Angio simulation for C-arm position planning
- Length measurements based on interactive centerline stiffening
- Comprehensive procedure planning report integrating images, measurements and device options

Procedure Planning Anytime, Anyplace

Plan your cases in minutes
with streamlined data access
and processing.

- Rapid, automated image processing
- Local operation and data storage
- PACS connectivity
- PC and Mac compatibility

For Mac (OSX 10.9+), Windows (7/8/10 64bits)
Free trial version upon request:
